# It all started in 1964

Just like all successful companies, it all started with a good idea and some hard graft.

Albert James Carey was born in 1927 in Kilburn, London.

In 1963, Albert James Carey (age 40) was working for a large manufacturing company based in Dunstable, Bedfordshire. He worked as a service engineer maintaining factory equipment. He mostly worked night shifts, the long hours were taking their toll on family life.

Albert was asked by his brother Peter to build a small baggage trailer. Albert used his garage space and some borrowed equipment and set about building the first AJC Trailer.

The trailer was a big hit with Peter's friends and neighbours within a few days they had 3 orders for more trailers. Albert got to work on the next 3 trailers.

Albert could see the potential in the trailers, and took a small advert in the Exchange & Mart magazine in 1964, advertising the 1st model: The 4' x 2'6" baggage trailer.

# Growing business

*from garage to factory in 1 year.*

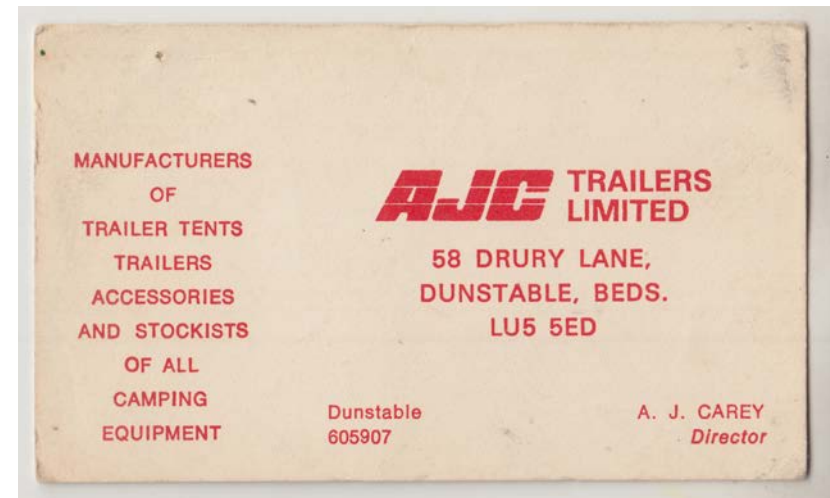

The Exchange & Mart magazine advert had generated lots of orders for the AJC Baggage Trailer. Albert couldn't keep up with the demand working out of his garage after night shifts. He soon quit his job to focus on the trailers.

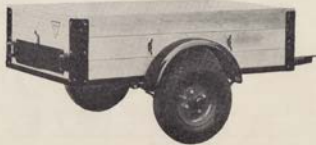

To fulfill the first batch of orders Albert was using friends garages in Luton and Watford to store materials needed to build the trailers.

A factory was essential to keep up with the demand. So, in late 1964 Albert decided to sell the family home in Wilbury Drive, Houghton Regis and invest in the new business.

They purchased Burgess Fruit & Veg Store in Drury Lane Houghton Regis. It needed a lot of work, removal of pigsties and green houses and a bungalow extension. Whilst the renovations and works were going on, the family even kept the Green Grocer operation going to help with costs. Within a few months the old shop was closed and AJC's first factory & showroom was open.

The rest is history !

# Camping Trailers

*1965 - 1984*

AJC started to adapt the baggage trailer to house a tent, within a few years AJC had established a name for themselves in the camping industry.

The first product was The TowTent. A fold out tent inside a small trailer, affordable and lightweight, this concept took off in a big way !

In addition to building 100 baggage trailers a week, The TowTent range was gaining popularity.

In 1972 a new factory in King Street, Houghton Regis was purchased, and the Drury Lane unit became an AJC showroom.

Tow Tent - AJC's 1st camping model

# National coverage

1976 - 1986

AJC Trailers soon had a nationwide coverage, with 6 showrooms opening selling camping/baggage trailers and all associated accessories.

- Houghton Regis, Beds.
- Nottingham
- Willenhall, Staffs.
- Northampton
- Manchester
- Thorbury, Glos.

Almost all of Albert's family and were now involved in the business.

# Camping Brochures

AJC Trailers had huge success in the 1970's. Many thousands of trailer tents were produced, making AJC the largest manufacturer in the marketplace.

Each of the 6 showrooms had the whole range on display along with a shop filled with spares and camping equipment.

All these products were made in the King Street, Houghton Regis factory until 1975. Production moved to a larger factory in Leighton Buzzard Bedfordshire.

# Roof tents

## *The Air Camper*

In addition to the camping trailer range, roof tents were gaining popularity and AJC developed their own version.

This was featured on BBC BluePeter in 1970's, the presenter John Noaks demonstrated the AJC Air Camper on national TV.

# Utility Trailer range

1987

During the 1980's the "Package Holiday" was becoming more popular. Holidays to Europe on coach and airplane were now more affordable than ever. This led to a serious decline for the UK camping industry.

As a result in the early 1980's AJC had to close their UK-wide showrooms and concentrate on their Utility trailer range. The Drury Lane Houghton Regis showroom was the last to close in 1983.

In 1980 production moved from the Leighton Buzzard factory to Townsend Road, Houghton Regis, shown here in the right.

Below is heavy duty trailer model built in 1984, The Nevada took it's name from the discontinued camping trailer range in the 1970's. This trailer was made from the load-bed of a flat bed Renault van. Working with a local van conversion company, Albert sourced these discarded units and turned them into a popular trailer, many 100's were built from 1983 to 1988.

---

---

# Glider Trailers

*1980 - 1985*

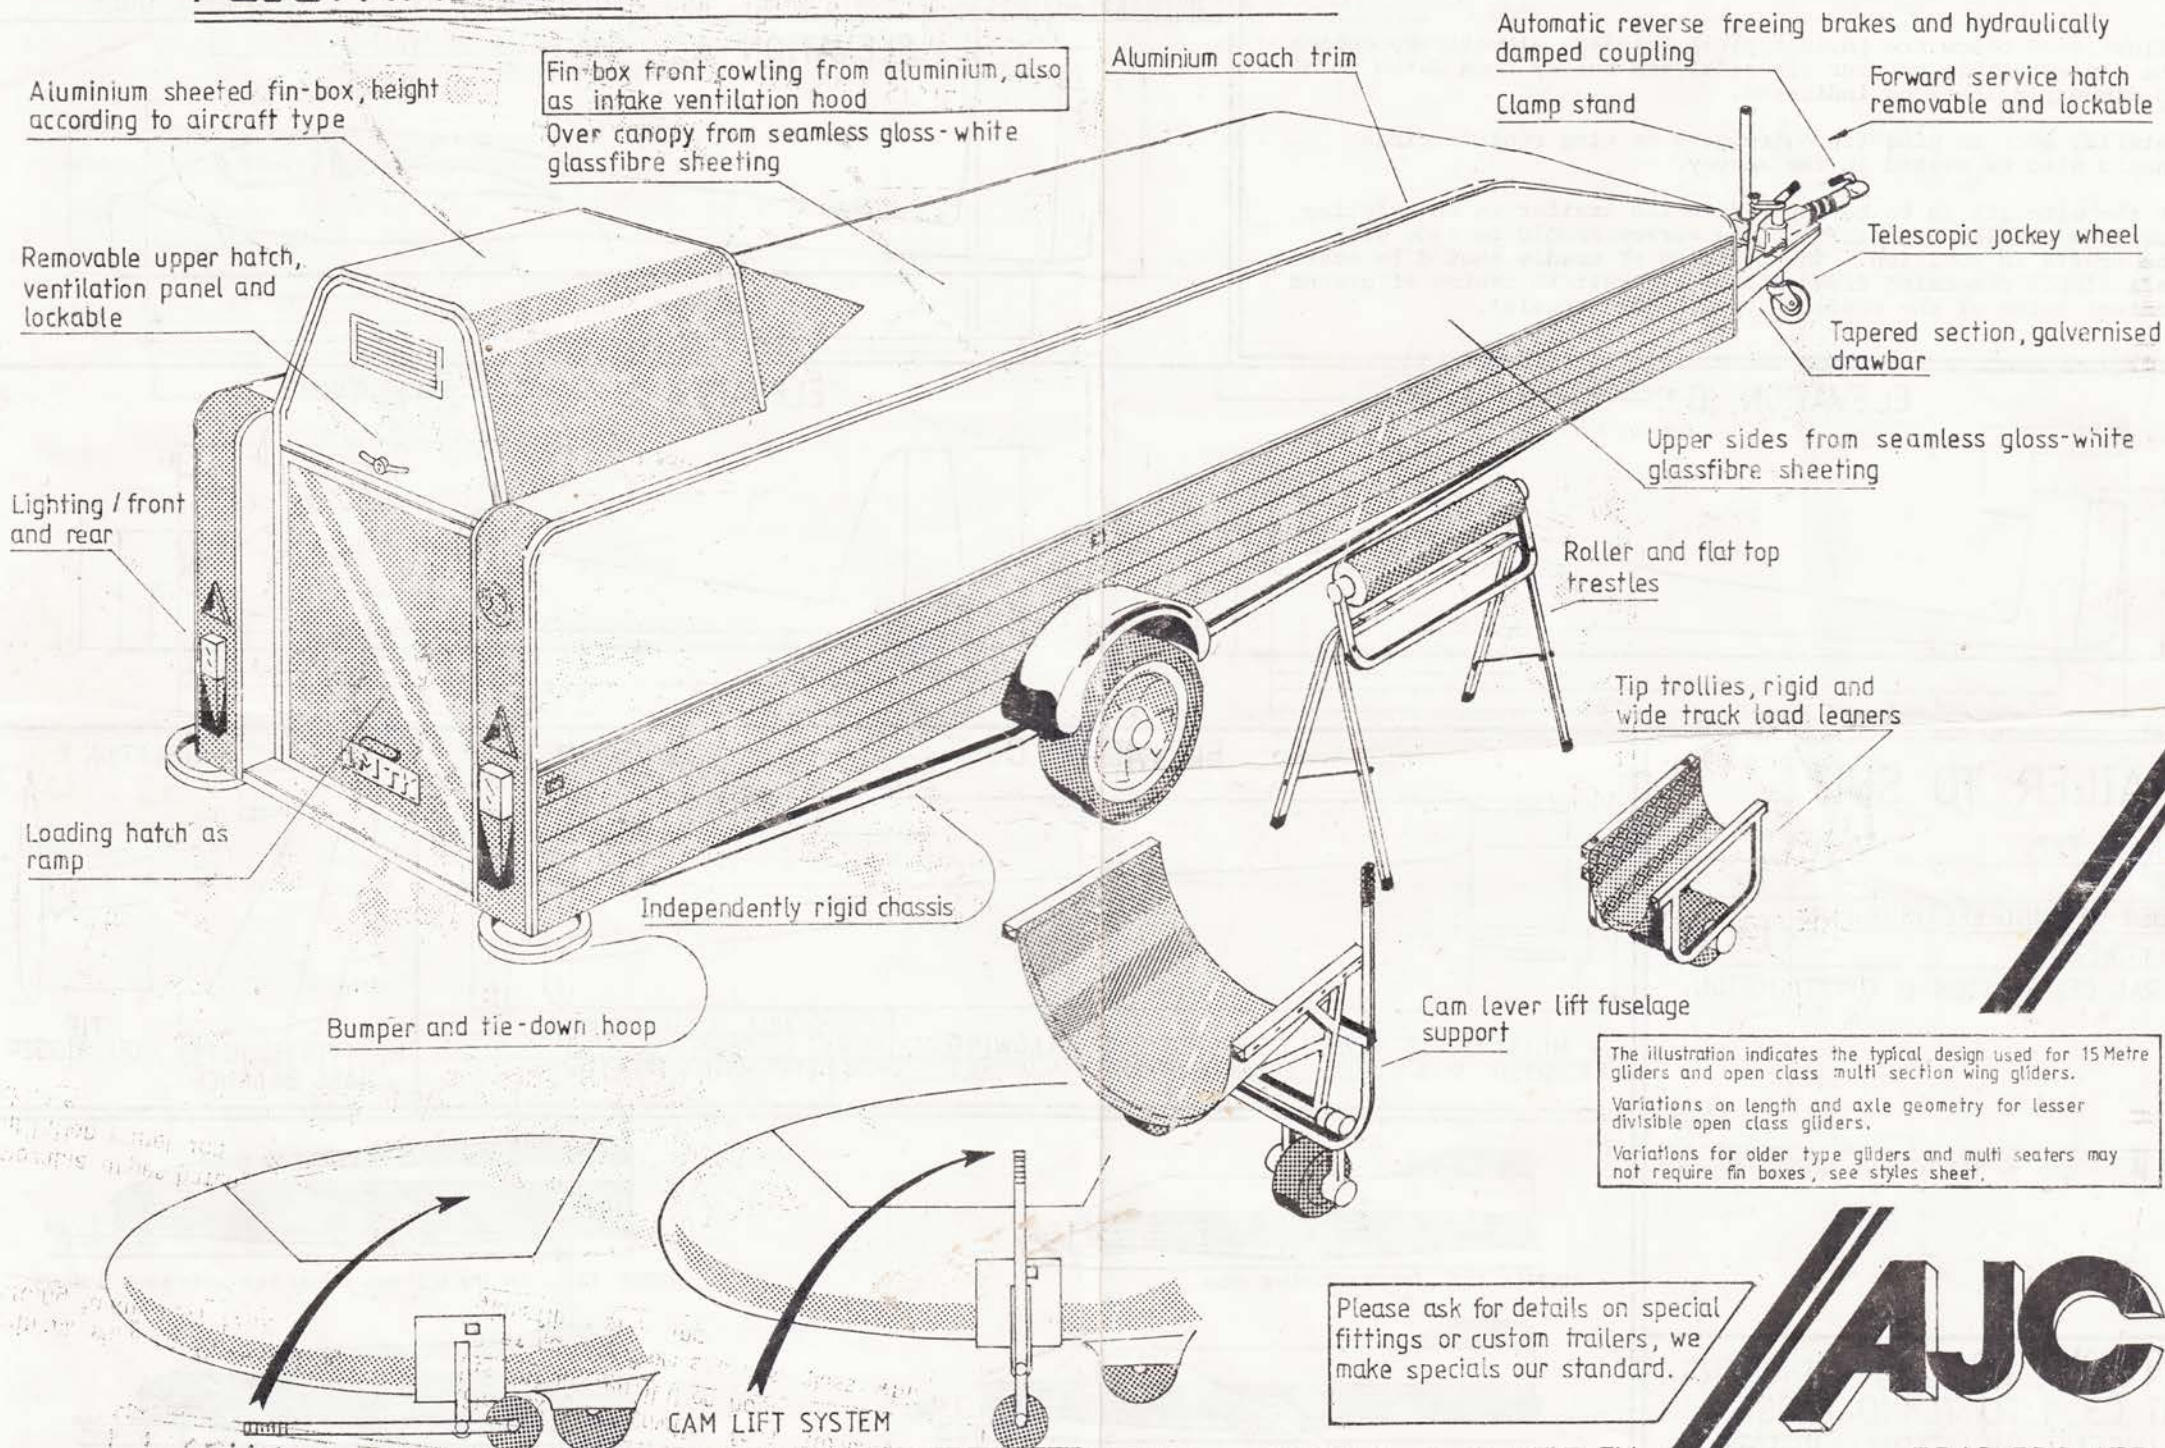

The AJC Dunstable factory was close to The London Gliding Club which made it easy to develop the design working closely with gliding enthusiasts.

# Catering Trailers

*1987 - present*

The first catering trailers were made in 1987, as a natural progression of the large storage trailer. They started as a basic unit, with an internal shelf and a plug socket for appliances.

As soon as the catering trailer concept was marketed, there was a steady demand, and the models soon became more sophisticated to accommodate more specialised food outputs.

The first trailers were made with white coated PVC panels, then moved onto GRP panels, which are lighter and stronger.

One of the first catering trailers 1987

# Catering Trailers

*1987 - present*

In the late 90's, Jav Samsa, Albert's grandson, finished college and started to work at AJC. Jav worked as an apprentice engineer and learned the business at all levels.

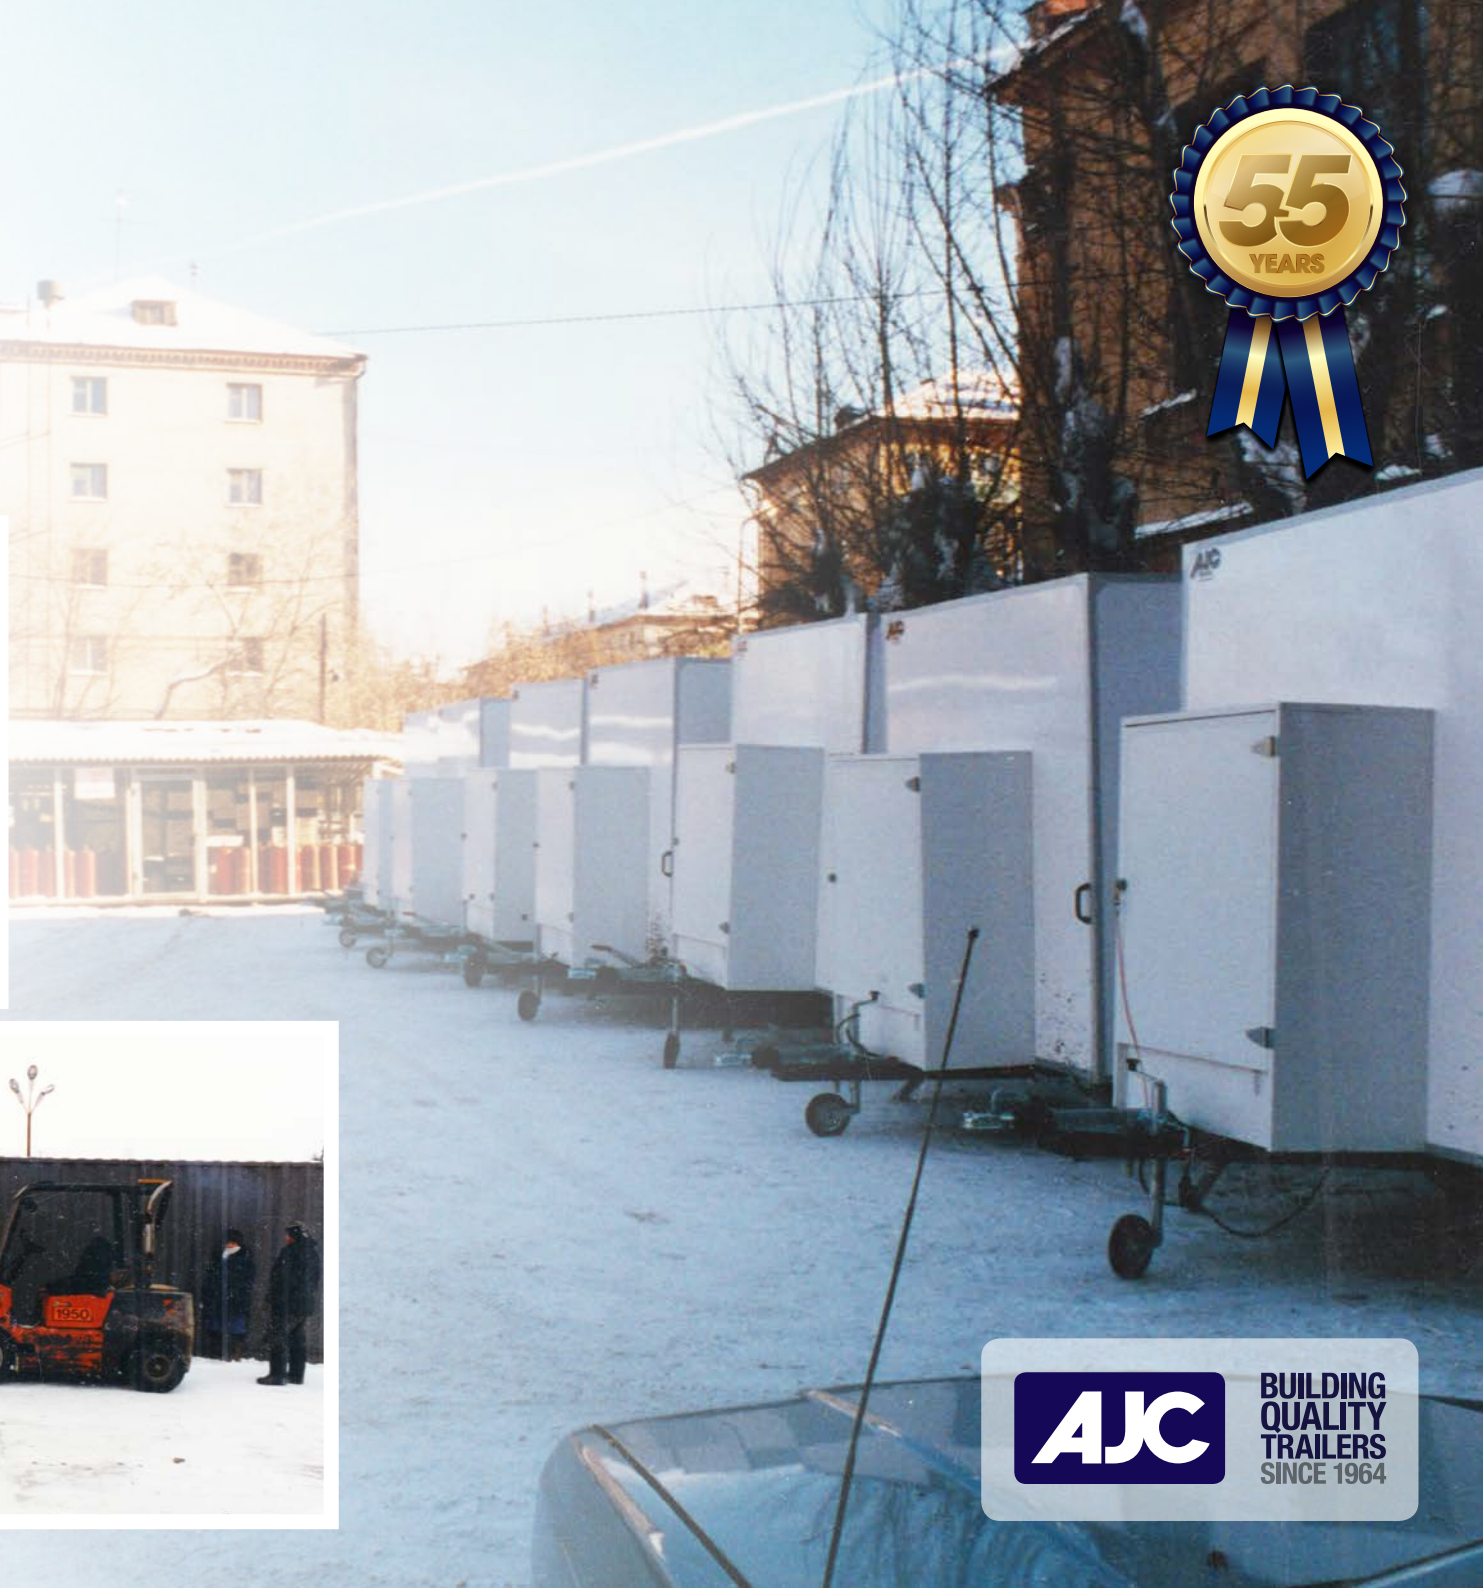

Jav started to develop the production and design of the catering trailer ranges. Jav has stayed with the company and owns and runs AJC Trailers today.

In 1998, AJC Trailers manufactured many trailers for export to Russia. Pictured here is the 1st batch delivered in temperatures around -30 °C.

They were all moved in shipping containers, and proved quite hard to remove the trailers from the containers.

# Company Brands

AJC Trailers began to separate into two separate divisions around 2007, when AJC began to build the EasyCabin mobile welfare unit.

The current Cosgrove Way factory was purchased in 2006 to accommodate the growth of the catering trailers, but soon became too small to produce both catering units and welfare units on the same production line.

In 2015, a new factory just around the corner was started only catering trailer production. At this point, a separation in the branding was needed to cater for different market sectors.

Site welfare, trailers, static units, hybrid power technology

Bespoke catering trailers, van conversions, retail installations

**BUILDING  
QUALITY  
TRAILERS  
SINCE 1964**

AJC's 1st welfare unit was a huge success, bringing to the market new and fresh design approach compared to the existing welfare products at the time.

AJC has continually improved on the design, leading to the EasyCabin unit becoming one of the most popular welfare solutions on the market. Many 1000's of EasyCabins' are in use today.

The EasyCabin design uses hydraulic axles to lower into a secure position and uses hybrid technology to ensure maximum fuel economy.

EasyCabins' major clients are plant hire companies that offer the cabin for rent. The largest fleet is over 1250 units strong, and available to hire nationwide.

December 2004, the very first AJC welfare trailer.

October 2005, the first AJC welfare unit with hydraulic axles. The current EasyCabin 12 design evolved from here.

January 2006 - 1st GRP panels, off for spray painting

January 2006 - 1st GRP panels, after spray painting

WELFARE UNITS

Trailer-made business success story

The manufacturers of Easycabin welfare units, AJC Trailers, report growing signs of optimism in the construction industry.

Leading hire firms are placing significant orders with AJC Trailers and the company says that 2013 is proving to be a busy year.

Jay and Jane Samsa are the husband and wife team running Luton-based AJC. Jay says: "Although our bread and butter business has always been catering trailers, the hire companies just can't seem to get enough of our welfare units. There seems to be movement in the construction industry. The demand for better welfare provision is there and we've been responding to it."

Jane and Jay Samsa from Easycabin: "encouraging signs in the industry."

EasyCabin No. 1

**BUILDING

## AJC Trailers

After the launch of the EasyCabin brand in 2006, AJC Trailers continued building bespoke catering trailers in the Cosgrove Way factory on the same production line.

## AJC Retail Solutions

With the appointment of Jeremy Baker in 2010, new retail product lines were developed that branched out into new market sectors. At this point the new company, AJC Retail solutions was established to continue with Bespoke products.

In 2014 the first major retail kiosk contract was completed, and as a result of its success, in 2015 AJCRS moved to it's own factory (Bilton Way)

AJC Retail Solutions now produces bespoke retail catering kiosks, and specialist catering van & trailer conversions along with bespoke shopfitting projects.

# People

AJC started as a family owned and run company and today it is still owned by the same family.

AJC has always invested in it's employees. The key to any companies success is the staff that run the day to day business

The key employees over the years are pictured here, we recognise their great and continued contribution to the company.

Linda Samsa, Edna Carr (Accounts & Sales 1970 - 2005), Jav Samsa, Myra Chapman (Accounts & Sales).

Rob Figliola

Paul Stannard

Kevin Daly AJC RS

Jane Samsa, Managing Director AJC RS

Jeremy Baker, General Sales Manager AJC RS

AJC EasyCabin: Lisa Gillett, Mark Samuel, Jav Samsa, Simon Fletcher

# The Future

AJC is a forward thinking, innovative company. AJC takes pride in developing hybrid technology to increase fuel economy and easy of use. Many EasyCabin products are formally recognised for their green credentials. AJC EasyCabin won their first Green Apple Award Environment Award in 2017, for the Ecosmart Hybrid system.

AJC EasyCabin have been at the forefront of the industry, driving development of systems and products that use hybrid technology and alternative fuels like hydrogen.

AJC Retail Solutions have moved into larger scale retail installations and high-end bespoke trailer / vehicle conversions.

Hydrogen + Solar = **ZERO** CO<sub>2</sub>

**No local carbon emissions, the future of site welfare.**

Hydrogen Fuel Cell

Solar panels

**Ecosmart welfare unit with ZERO CO<sub>2</sub> emissions.**

- Zero carbon emissions**  
Only water vapour.
- Near silent operation**  
Very quiet with no vibrations.
- On-demand power & heat**  
On any appliance in the cabin.
- Low maintenance**  
Fuel cell air filters only need replacing.
- Safe & easy to re-fuel**  
Hydrogen gas bottles. Available from most gas suppliers. Easy to replace.
- Zero fuel with solar panels**  
On summer days up to 100% of the power demands can be met from the solar panels.

Is your site welfare compliant with new UK clean air & ultra-low-emissions zones?
