

Rail welfare is easy.

EasyRail®

SafeTea Trolley

Patent Pending 1521414.1

Track side anti-fatigue hot and cold drinks provision. Mounted onto a rail platform that travels along the track with the crew, hot drinks are never out of reach.

Dramatically improve productivity!

The unit is designed to be a clearly visible beacon for short breaks on long shifts, aiding productivity & safety at work on the rails. The SafeTea Trolley is an enhancement of facilities available on site and moves with the team so that people can take regular breaks safely and effectively without having to return the main welfare facilities.

The SafeTea Trolley is a lightweight unit, easy to install on the unit with a simple four man lift. There is 20 litre hot water tank and a generator to provide upto 13 hours of hot drinks.

 HOT	 COLD	108kg Without generator	 UP TO 13h Hot water supply without re-fueling
		157kg With generator	

EasyRail[®] SafeTea Trolley

Features

- 9 mm polymer moulded body
- Moulded carry handles
- Brackets for carry handles
- Rail track approved Stephill generator
- Built in generator drip tray
- Open access generator housing
- 110v cecilware water boiler
- 3 cup dispensers
- 12v Shurflo water pump
- 12v LED lights
- For use with onsite water container
- Secure storage cupboard
- Unit to trolley fixings

Benefits

- Robust, easy clean, light weight construction
