

# Cold weather storage

## A GUIDE TO LOOKING AFTER YOUR CABIN WHILST NOT IN USE.

1. Run the heating system at least 1 hour with the heating on full. Confirm heater is running and all blowers are producing heat. **1**
2. Check the generator oil. **2**
3. Check the generator starter battery is fully charged. **3**
4. Check the main battery bank is fully charged. **4**
5. Empty the water storage, press all taps to drain the system. **5 6**
6. There is a drain valve inside the plant room, turn to drain the water. **7**
7. Ensure the waste tank has been emptied. **8**
8. Lubricate your door mechanisms. Use only a silicone, or P.T.F.E. based lubricant spray which will leave a long lasting and protective film on moving parts. **9 10**
9. Ensure the door cylinder operates correctly and check any turns are fixed to the cylinder, tightly—tighten the thumb turn grub screw if needed. **8 10**
10. Ensure the generator is on 'AUTO'. **11**
11. Ensure the isolating switch is 'OFF'. **12**
