

Cold weather storage

A GUIDE TO LOOKING AFTER YOUR CABIN WHILST NOT IN USE.

1. Check the generator oil.
2. Check the generator starter battery is fully charged.
3. Check the main battery bank is fully charged.
4. Empty the water storage. There is a drain valve inside the plant room, turn to drain the water.
5. Lubricate your door mechanisms. Use only a silicone, or P.T.F.E. based lubricant spray which will leave a long lasting and protective film on moving parts.
6. Ensure the door cylinder operates correctly and check any turns are fixed to the cylinder, tightly—tighten the thumb turn grub screw if needed.
7. Ensure the isolating switch is 'ON'.
